The market remained very but steady for all grades of stock during the greater part of the week, with the supply of all grades equal to the demand, which, to a great extent, was attributable to the bad weather. The week closes with increasing demand for the better grades, and while sup-ply has been equal to demand, we anticipate a clearing of the yards early in the coming week. There bay been considerable inquiry for stockers and feeders the past day or, two, and the week closed with our yards tare We look for a better feeling in all
